Autumn Price List

of

Hardy Liliums

Dutch Bulbs

and

Native American Plants

1937

OFFERED BY

WILLIAM N. CRAIG

Front Street at Federal

WEYMOUTH, MASS.

Telephone Weymouth 1110

A very cordial invitation is extended to all interested in hardy gardening to look over our gardens. May is a good time to see Dutch Bulbs, Lilies are in season from early June until mid-October, Herbaceous Perennials are in flower from April until December. Even in winter we usually have some bulbs or herbs showing flowers in warm locations.

The increased demand for Tulips and the fact that stocks of many varieties seem likely to prove inadequate may make revision of the prices of some varieties necessary as the season advances. It had been hoped that it would be possible to import Narcissus bulbs for the coming season and thus offer them at somewhat reduced prices but protests of prominent home growers and propagators of these, based on the theory that their business might be injured and that there was a possibility of certain pests being introduced with them—all of which we already had in this country in ample quantity—caused the Federal Horticultural Board to insist on all bulbs being subjected to a hot water treatment of several hours at the expense of the importer which would destroy all flowers and badly cripple bulbs for succeeding years, so that it is not possible to give the lower prices hoped for on these bulbs.

Our overhead cost being low we are able to give attractive prices. We carry only the highest quality of all Dutch bulbs and we cordially invite an inspection of our extensive stocks for all those interested in seeing and securing top quality bulbs.

LILIUMS

are our leading specialty. We grow these in thousands in Weymouth in full sunshine, and our collection is without a rival in New England. From a very small beginning a few years ago a large business has been built up in these glorious hardy bulbs, and shipments are made to all parts of the United States as well as Canada, Great Britain and other countries. Virtually every variety listed may be found growing here and unlike the majority of dealers we are not dependent on bought in stock, except in the case of a few varieties. The superior advantages of home grown bulbs with their greater plumpness must be apparent to every grower of these beautiful bulbous plants.

Some varieties like *candidum* and *testaceum* are ready in August, a very large number are to be had in September, and this month and October are the best in the year for the planting of the great majority of Lilies. The *auratums*, *speciosums*, *sulphureums*, and a few other varieties can be planted later and it is better to get these in during late fall rather than wait until spring. Some of our most successful plantings of Lilies have been made in late December and January, removing a crust of frost to get them into the ground. Very little winter covering is necessary for Lilies, our own beds get virtually nothing at all. So long as drainage is good there need be no fear of Lilies winter killing. To extend the flowering season plantings of such varieties as *speciosum*, *auratum*, *Henryi*, *regale*, *sulphureum*, *elegans*, *tigrinum* and some others can be made in early spring.

Our first Lilies to open in 1937 were *tenuifolium* and *monadelphum*, both during late May, the greater number of Lilies bloom during June and July but quite a number flower later and we usually have *speciosums*, *Formosanums* and *sulphureums* until mid-October which makes a fairly long season.

Plant *candidum* only $1\frac{1}{2}$ —2 inches deep, *testaceum* and *chalcedonicum* not over 3 inches. All varieties making roots only from below the bulbs should be planted shallow. Stem rooters like *regale*, *auratum*, *speciosum*, *Henryi*, *sulphureum*, *Sargentiae*, and *Willmottiae* require covering 8 inches and even more is better should soil be very light. European varieties like *candidum*, *chalcedonicum*, *monadelphum*, *martagon*, *testaceum* and *Pyrenaicum* like a well sweetened soil while the Asiatic varieties either prefer one which is alkaline or neutral. *Regale* seems to grow equally well in an acidy as a sweet soil. Some varieties like *candidum*, *testaceum*, *chalcedonicum*, *martagon*, *Japonicum* and *rubellum* are best laid on their sides at planting time, all should be bedded in sand and covered with it before being filled in.

Very retentive soils may be improved by adding peat moss, sharp sand and fine coal ashes. As a summer mulch peat moss is excellent, but do not use it for the European varieties. Where the more tender and doubtful varieties are being tried it will assist very much to lay strips of tar paper over the plantings to shed water in winter.

Lilies are effective in perennial borders, but when planted there should not go too near husky growing plants, when mulching beds with manure avoid scattering it over the Lilies. In beds or borders by themselves with a background of evergreen or not too robust deciduous shrubs Lilies do remarkably well, a groundwork of violas, or *Nepeta Mussini* may be used if desired. In rhododendron or azalea beds *auratum*, *superbum*, *paradolinum*, *Canadense*, *Henryi* and *Grayi*

do well but do not use any of the large bulb rooting varieties. For the wild garden our native varieties like *Philadelphicum*, *Grayi*, *Canadense*, *superbum* and *pardalinum* are good, so is *tigrinum*, the *elegans* and *umbellatum* varieties, and *croceum*. For rock garden plantings some of the best varieties are *tenuifolium*, *Golden Gleam*, *amabile*, *rubellum*, all of the forms of *elegans*, *concolor*, *callosum* and *cernuum*. Numerous varieties are fine for pot culture including *regale*, *speciosum*, *auratum*, *Henryi*, *Japonicum*, *sulphureum*, *Batemanniae*, *Croceum* and others.

Fresh animal manures should never be used for Lilies outdoors, but if very old and well rotted it is perfectly safe to use for any and all varieties, fine bone is excellent also but no chemical fertilizers should ever be used on them. Strong stimulants are all right for those growing in pots in greenhouses but are ruinous outdoors. Peat moss is excellent for the bulk of Lilies and leaf mold is liked by every variety we have ever grown.

Beds entirely devoted to Lilies in a range of varieties to flower over a long season are becoming popular. Such beds should be well prepared as regards drainage. Low growing annuals or perennials can be used as a ground cover and will furnish a suitable summer mulch.

Our displays of Lilies have won numerous gold, silver and other medals. On June 28, 1933 we exhibited no fewer than 60 varieties in Horticultural Hall, Boston, these securing a large gold medal.

A moderate number of Lilies may be planted in spring, no American varieties should be planted at that time and only one or two European kinds. Results from spring plantings will never at all equal those from fall or early winter. A large proportion of those offered in spring have been carried over winter in cold storage, these will never under any conditions give nearly so satisfactory results as fall plantings. A number of varieties if spring planted will make no growth above ground the same year but will usually make up good bulbs to bloom a year later.

On importations of such Lilies as *auratum*, *Japonicum*, *Rubellum* and others from Japan we insisted last season that all be sent with roots attached, as a result these never arrived in better condition and outdoors they are this year extra good. The shipping of these bulbs with roots prevents in large measure the basal rot which has destroyed such great numbers in previous years. This year shipments of these and some other varieties will come with roots attached.

We wish to draw special attention to our collection of *Lilium* seeds which is the most complete offered in America. Many varieties will germinate within 3-4 weeks and a few will bloom the second season. If started under glass in heat certain kinds can be flowered the same year including *Formosanum*. We have made shipments of *Lilium* seeds to France, Great Britain, Soviet Russia, Japan, British Honduras, Cuba, South Africa, New Zealand and Italy.

LIST OF HARDY LILIUMS

Amabile. A charming stem rooting Lily blooming in mid-June and attaining a height of 18-24 inches. Color bright red spotted black, and with some chocolate blotches, a very good variety for the rock garden.

\$.30 each, \$ 3.00 doz., \$ 20.00 per 100

	Each	Doz.
Auratum (Golden rayed Lily of Japan). Massive flowers with distinct gold bands and heavily spotted. Very fragrant, blooms in late July and August	25-.50	each, 3.00-5.00 doz.
Auratum Var. <i>Pictum</i> . Heavily spotted with rich crimson, very fine form	75-1.00	each, 9.00 doz.
Auratum Var. <i>Platiphyllum</i> . Carries broader foliage and the largest flowers of any of the auratums, more lightly spotted than in the type and often entirely spotless...30-.50	each, 4.00-6.00	doz.
Auratum Var. <i>Rubro-Vittatum</i> . The flowers of this form are heavily blotched and spotted dark rosy pink, very distinct	1.00	each, 10.00 doz.
Auratum Var. <i>Virginale</i> (Wittei). Beautiful snow white broad petalled flowers, a very lovely variety...75	each, 8.00	doz.
Backhouse Hybrids. This grand race of Lilies was raised by the late Mrs. R. O. Backhouse in England. They are the results of crosses made between Martagon and Hansonii, two very excellent Lilies. The available stock of these in the world is still quite limited. All bulbs offered are of blooming size and these will attain a height of 5—6 feet within two years.		
Brocade . Very vigorous. Color orange yellow, rosy pink without, interior dotted and marbled pink and chocolate		3.00
Mrs. R. O. Backhouse . A superb and very vigorous hybrid color orange yellow spotted purple		3.00
Sceptre . Extremely vigorous, attaining a height of 6 feet. As many as 40 of the star-shaped flowers, which are orange colored with a pinky buff shading, are carried to a stem		3.00
Sutton Court . The reflexing orange yellow flowers of this variety are heavily spotted with purple, exterior of petals is shaded with pink and interior with pale yellow. Very robust		3.00
Bolanderi . Californian lily with reddish purple flowers, spotted dark purple. Something in the way of Columbianum75
Batemanniae . A superb lily blooming in late July. The stems attain a height of 3—4 feet and this season many carried 10-20 flowers each. The upright facing flowers are of a rich orange apricot color. We have a grand stock of this splendid lily.	.35 each, 4.00 doz.,	30.00 per 100
Browni Odorum . An early July flowering Lily with large trumpet shaped flowers purplish without and creamy white within. Distinct fragrance	1.00	10.00
Browni Colchesteri . Cultivated bulbs secured originally from England. A very fine form. This Lily needs a		

	Each	Doz.
warm and very well drained location.		
Is excellent for pot culture75	8.00
Bulbiferum. A native of Central Europe this lily proves to be a good grower in North America. The bright orange red flowers are dotted deep purplish black and tinged or blotched yellow in the centre. Flowers in early June50	5.00
Callosum. Flowers are orange red, unspotted, reflexed in the same way as superbum and Chalcedonicum, loves full sunshine, blooms late July	.30	3.00
Canadense. A beautiful and graceful native lily succeeding well in either sunshine or shade. Fine either in the garden or for naturalizing. The drooping reflexing flowers are yellow to reddish in color, heavily spotted within	20 each, 2.00 doz., 15.00 per 100	
Extra Big Cultivated Bulbs	.40 each, 4.00 doz., 30.00 per 100	
Canadense Flavum. The yellow form of the Canadian lily. Succeeds splendidly in full sunshine but will also thrive in fairly heavy shade.	.25 each, 2.00 doz., 15.00 per 100	
Canadense Rubrum. The red form of this charming lily.	.25 each, 2.50 doz., 18.00 per 100	
Candidum. The most immaculate and beloved of all garden lilies. Needs a well sweetened soil and being a pure bulb rooter very shallow planting, not over 2 inches deep. Lay bulbs partly on their sides at planting time, having dusted well with lime or sulphur, bed well in sharp sand. Home grown bulbs are ready in late July, imported ones in August and early September. As this lily makes a rosette of leaves in late summer early planting is desirable. We offer several types of this lily but specially recommend the new Salonica form.		
American Grown. Fine sound bulbs	3.00-5.00 per doz.	
English Grown. Very sound and hard bulbs, the type seen all over Great Britain in every cottage garden, produced by one of the most expert growers in England.....	3.00-6.00 per doz.	
Dutch Grown. These are fine firm bulbs and are giving better satisfaction than the French.	4.00-5.00 per doz.	
North of France. This variety is very heavily imported but unfortunately bulbs have been badly diseased in recent years. We offer them from the best available source.	3.00-7.50 per doz.	
Peregrinum. A type with black stems which has proved more disease proof than others. We have a limited supply of this variety in small bulbs.	.75 each, 8.00 doz.	
Salonica. While attending the great Lily Conference in England in 1933 I saw spikes of this new variety 7 feet high carrying 25-30 flowers each. In 1936 I secured a good batch of this variety which has proved more nearly		

Each Doz.

bortrytis proof than any other candidum form. All our larger sized bulbs were sold and we only had two small sizes to plant out. These flowered over a week earlier than any other type and while unsprayed have not shown a trace of disease in a season very favorable to its spread. Third sized bulbs have carried 10-15 flowers each, customers report 19-26 on the larger sizes bought. Many bulbs do not make any rosettes of leaves like the other types but even tiny bulbs will bloom. The discovery of this new form is the most important one made in lilies since that of regale. While we will have a good stock of this lily to offer, demands are likely to exceed the supply and early applications for bulbs are suggested. These will be ready early in August.

3.00-4.00-6.00 and 8.00 per doz.

Special 100 rates on all forms of candidum except Peregrinum.

Carolinianum. Similar to superbum but is smaller and less husky, loves sunshine40 4.00

Centifolium. A magnificent new lily of great vigor and hardiness, introduced by the late Reginald Farrer. The immense pure white trumpet shaped flowers are flushed with yellow at the base of the trumpet, outside the trumpets are streaked with green and light brown. Stem rooter and requires deep planting. This seems destined to become one of our dominant garden lilies when stocks increase. Needs good winter protection. Good flowering bulbs 1.50-2.00 each

Cernuum. This Chinese lily has grass-like foliage and very wiry stems. Flowers are lilac rose in color, spotted wine color, fragrant and the plants are similar to tenuifolium in habit. Quite a scarce lily35 4.00

Chalcedonicum (Scarlet Turks Cap Lily). A native of Greece and one of the parents of testaceum. The brilliant scarlet recurving flowers are produced in July.
Extra large bulbs 1.50 15.00
Strong flowering bulbs 1.00 10.00

Chalcedonicum maculatum. Fine spotted form 2.50 each

Columbianum var. Ingrami. A dependable variety from Oregon and other Pacific coast states. The color is golden yellow, spotted red, likes a moist location in summer50 5.00

Concolor. This charming rock garden lily comes to us from Siberia, it is an early bloomer with rich crimson scarlet flowers facing upwards, rarely exceeds 18 inches in height. Follows tenuifolium in its season of bloom35 3.50

Coridion. Resembles concolor in its habit of growth. Color deep yellow with dark spots40 4.00

	Each	Doz.
Creelmanni (Creelman Lily). A superb hybrid raised in Canada between regale and Sargentiae. Intermediate in habit and flower, but much later flowering. Extra large bulbs	3.00-5.00	each
Croceum. This is the true old orange lily of British gardens where it is seen growing luxuriantly on every hand, grows much taller than umbellatum and blooms later, not infrequently carrying 16—20 flowers to each stem. Color rich orange, one of our very best lilies40	4.00
Croceum Chaixii. A charming dwarf variety from the Maritime Alps. Dwarf, pale yellow and with rather narrow petals, fine for rock garden..	.75	each
Dauricum. Often called Davuricum, a form rarely seen in gardens, usually some form of umbellatum being substituted for it. Flowers more nearly resemble those of our native Philadelphicum, orange red in color, spotted black and facing upright30	3.00
Dauricum var. Luteum. A very lovely golden yellow form, scarce	1.50	each
Dauricum var. Pardinum. A grand form of Dauricum. Large erect flowers which are rich orange flushed with yellow and apricot, a sturdy grower. Attracted much attention at the great Lily exhibition in London in July 193650	5.00
Davidi (Thayerae). This rather scarce Chinese lily is of graceful habit and while the flowers are similar to those of Willmottiae they are produced later, it has a sturdier stem however. Flowers are cinnabar red in color and the foliage is narrow and grass-like. Extra strong flowering bulbs	1.00	10.00
Second sized bulbs of flowering size	.50	5.00
Davmottiae. A grand hybrid raised in Canada between Davidi and Willmottiae and distinctly superior to either parent, flowers are similar to those of Wilmottiae but it is a better grower than that variety, more graceful and floriferous carrying 35-45 flowers to a stalk	1.00	10.00
Elegans (Thunbergianum). A dwarf growing and early flowering type of lilies coming in several colors. Good both for the border and the rock garden as well as the wild garden. There are some very fine forms of this easily grown lily. Fine mixture.	.20 each, 2.00 doz., 15.00 per 100	
Elegans Alice Wilson. An excellent yellow form, dwarf and carrying extra large flowers, also forces very well50	5.00
Elegans Aureum Nigro-Maculatum. Apricot yellow with black spots25	2.50
Elegans Atro-Sanguineum. Dark red, crimson in centre25	2.50
Elegans Leonard Joerg. A good deep apricot variety with black spots.	.30 each, 3.00 doz., 22.50 per 100	

	Each	Doz.
Elegans marmoratum aureum. An excellent pure yellow form, 8 inches in height40	4.00
Elegans Red Star. Splendid red, suffused with orange40	4.00
Formosanum (Philippinense Formosanum). We are now using the European name for this fine lily, as bulbs of this hardy form are from Formosa and not the Philippines the older name should be dropped. This is the most remarkable lily introduced in late years, its ease of culture with its facility of increase from seeds makes it come within the range of everyone with a garden. Seeds sown early will produce flowering plants easily the same year. Has a wiry stem, long graceful leaves, trumpets are much longer and narrower than those of regale but similar in color, there is a pure white form favored for forcing but outdoors we much prefer the variety with the exterior of the trumpets pleasingly colored. Heavy stem rooter.		
Early Variety. This starts blooming outdoors as regale finishes, plant 8 inches deep. Height 2-2½ feet.		
Late Variety. Blooms from mid-August until late October, grows taller than the early variety, sometimes 6-8 feet. Price of both forms		
	.30 each, 3.00 doz., 20.00 per 100	
Grayi. Named in honor of Prof. Asa Gray, the noted botanist. Coming to us from the mountains of Virginia and North Carolina, this lovely and graceful lily takes kindly to garden culture in New England. The pretty red tubular shaped flowers are yellow, spotted brown and are very freely produced. Prefers some shade like many other lilies, but thrives well in full sunshine.		
	.35 each, 3.50 doz., 25.00 per 100	
Giganteum Himalaicum. Not to be confounded with the form of longiflorum going under the name of giganteum, this is the tallest growing and most noble of all lilies. Not a plant for the open garden, the ideal place for it is in an open glade in a piece of woodland where it can be sheltered from strong winds. The large bulbs should be planted shallow in soft mucky ground in which coarse sand has been freely mixed. Spring planting is best. The large tubular shaped flowers are semi-pendant and pure white in color with a purplish tint near the base and purple midribs, the flowers are very fragrant.		
Strong bulbs	2.00-3.00	each, 22.50-33.00 doz.
Hansonii. Hanson's lily is easily one of the best 6 varieties in cultivation. Leaves are carried in whorls and persist until quite late. The yellow		

	Each	Doz.
flowers are slightly reflexed, yellow in color with brown spots and fragrant. Succeeds well in both sunshine and shade. A late June bloomer.		
Extra large bulbs50	5.00
Strong flowering35	4.00
Henryi. Sometimes called the "yellow speciosum." The orange yellow reflexing flowers are produced in August and early September. This lily produces very big bulbs, often attains a height of 7-8 feet or more, and is not only very floriferous but absolutely dependable, carries very rich green foliage. Must be planted 8-10 inches deep for best results	.25, .40, .60 each 2.50, 4.00, 6.00 doz. 20.00, 30.00, 40.00 per 100	
Humboldtii Magnificum. One of the best of the Californian lilies. Has done very well with me in the open but thrives better in an open woodland glade where it will be protected from cutting winds. Flowers in form resemble superbum but are more heavily spotted with purple. Strong cultivated bulbs, far superior to those collected60 7.00
Japonicum (Kramer) . The most lovely of pink Japanese lilies. This has done amazingly well outdoors with me even when planted as late as Christmas week, many stalks have carried 6—7 flowers each in the open field and unprotected. The stories told in many catalogues that this lily is delicate and must be pot grown altogether are pure nonsense. Give it well drained soil, use plenty of sand around the bulbs laying them on their sides. Flowers mainly in July but will persist until well into August. Makes a fine variety also for pot culture	50 each, 5.00 doz., 35.00 per 100	
Kelloggi. A very dainty and pretty Lily from North Western California, the stems attain a height of 2—4 feet, flowers are pink spotted purple and are fragrant, likes a well drained position in a rockery, or on the banks of a sloping piece of woodland, flowers in mid-June50 5.00
Longiflorum foliis albo marginata. A hardy form of the Easter lily with very attractive variegated foliage, also makes an excellent pot plant.	.50 each, 5.00 per doz.	
Longiflorum Giganteum. This, the popular lily for Easter forcing, is also a grand variety outdoors in New England. Plant in November 8—10 inches deep. Flowers produced in the open are very much larger than under glass and quantities of large bulbets will be found on the stems at digging time, some of these will flower the next season. Proves perfectly hardy.		
Extra large bulbs50	5.00

	Each	Doz.
Longiflorum Harrisii. The earliest flowering of the longiflorum varieties under glass this variety has with us flowered latest outdoors, nor has it grown so tall as either giganteum or formosum. Bulbs of this lily are ready early in August. We find this Lily perfectly hardy but outdoor planting should be delayed until late October.		
Extra fine bulbs50	.75 each, 5.00, 8.00 doz.
Longiflorum Erabu. A fine variety from the island of Erabu, now much grown for Easter flowering succeeding in a cooler temperature than giganteum, proves perfectly hardy in New England, blooming in July50	5.00
Longiflorum Praecox var. White Queen. A splendid pure white form coming freely from seeds. We are glad to be able to offer good flowering bulbs this season for the first time. This is the best snow white longiflorum yet introduced50 to 1.00	each, 5.00-10.00 doz.
Marhan. A fine hybrid lily raised between Martagon and Hansonii, has a fine constitution. Flowers are fairly intermediate in character. Good flowering bulbs	1.50	
Marhan. var. Ellen Willmott. A lovely hybrid between Martagon album and Hansonii. Color clear orange with reddish brown spots and streaks extremely vigorous	1.50	
Martagon. The old purple martagon lily often attains a height of 6 feet, carrying up to 30 flowers per stalk. Flowers in mid-June near Boston; cover 4 inches	25 each, 2.50 doz.,	18.00 per 100
Martagon Album. The white martagon lily produces its waxy white recurving flowers a few days later than the purple variety, it is one of the most lovely and graceful lilies in cultivation, has a strong constitution. Large bulbs65	7.00
Fine bulbs50	5.00
Martagon Dalmaticum. One of the finest forms of martagon, very robust flowers are occasionally wine red in color but usually deep glossy purple appearing black in the distance. Choice and scarce	2.50	
Martagon Cattanae. Rich glossy blackish crimson flowers, a remarkable form, very scarce	3.00	
Maritimum. This Californian Lily is rather closely allied to the better known Canadense. The reflexed orange yellow flowers are tipped red and spotted light purple60	6.50
Maximowiczii. A late August flowering lily, resembles tigrinum a little in habit and flowers but is a later bloomer and rather less vigorous. The recurving red flowers are spotted purplish brown. Cover bulbs 6-8 inches35	4.00
Maxwill. A splendid hybrid between L. Maximowiczii and Willmottiae,		

Each Doz.

raised in Canada. Has a sturdier stem than Willmottiae and is a little lighter in color. A splendid garden lily	2.00
Medeoloides. A good rock garden lily of martagon habit, flowers are scarlet, shaded apricot and occasionally spotted black50 5.00
Michiganense. Presumably a natural hybrid between Canadense and Superbum flowering in late July. Very attractive and a good grower40 4.00
Monadelphum Szovitzianum (Colchicum). A very beautiful lily from the Caucasus. Likes very well drained ground and if a sheet of tar paper is spread over the bed in winter to exclude water they will do all the better. The rich yellow fragrant flowers appear in early June arranged like pendulous bells around a sturdily graceful stalk.	
Extra fine bulbs60, .75 each, 6.00-7.00 doz.
Occidentale. Believed to be a hybrid between maritimum and pardalinum. Flowers are deep blood red with a few maroon spots in centre, loves moisture. A very rare variety75
Ochraceum. Often confounded with Nepalense from which it is quite distinct. Shows much variation in both flower and leaf. Color is yellow but not of one fixed shade, usually the tube is heavily stained with wine purple, a fine lily for pot culture and may prove amenable to open air conditions when better understood.	
Strong bulbs	2.00
Pardalinum. A very good Pacific Coast lily flowering in July. Of vigorous habit and easily attaining a height of 5—6 feet. The recurving flowers are bright orange in color spotted with deep crimson25 2.50
Pardalinum Giganteum. A magnificent form with larger and much more brilliant flowers than the type, possesses great vigor, our plants this year attained a height of 8 feet. We offered this variety for the first time in the east in 1930 and it has made good everywhere.	
	.50, 1.00 each, 5.00, 10.00 doz.
Parryi. A lovely Pacific Coast lily growing 4 feet in height. Lemon yellow in color with light chocolate brown spots, has a delicate fragrance. Likes plenty of leaf mold or peat moss and a moist location. Cultivated bulbs	
	.75 8.00
Parvum. A very pretty and graceful Lily from the Sierra Nevada Mountains which succeeds very well in the eastern states. Flowers are recurving, orange yellow in color and 1½ to 2 inches across	
	.50 5.00
Parvum Luteum. A pure yellow form which is very highly prized. One of the most charming of our Pacific Coast Lilies	
	.50 5.00

Each Doz.

Philadelphicum. A fine lily native to our eastern states. The cup shaped flowers are of large size and carried 1—6 to a stalk. The orange colored flowers shade to scarlet at the tips and are rather heavily spotted, prefers shade and some low herbage to cover the ground.	.20 each, 2.00 doz., \$12.50 per 100
Extra large bulbs40 each, 4.00 doz.
Philippinense Formosanum (See Formosanum).	
Pomponium. A native of Italy this lovely lily resembles Chalcedonicum but blooms much earlier. Seems to prefer a heavy soil with some grit added and likes lime50 5.00
Pride of Charlotte. A truly superb new Lilium raised in the cold region of Northern Vermont. One which has stood the test of severe winters and hot summers and has come through unscathed when many regales, Sargentiae and other varieties suffered severely. It flowers in late July and is a very sturdy grower with trumpets rather more constricted than those of regale but much longer. The inner portion of the trumpet is white with a soft sulphur suffusion, the outer part resembles Sargentiae of which this is a very much glorified form. It produces large dark colored bulbils abundantly, these starting to bloom the second year. It also seeds quite freely.	
Strong flowering bulbs	1.50—3.00 each
Princeps. A hybrid between regale and Sargentiae and in our estimation better than either parent. This superb lily was raised at the Dominion Experimental Farms, Ottawa, Ontario. It greatly extends the regale season as it flowers nearly a month later, the immense trumpets are larger and purer than those of regale, the exterior of the trumpet having hardly any trace of the brownish purple coloring seen in regale, being green and white.	
Strong flowering bulbs	1.50 15.00
Good flowering bulbs	1.00 10.00
Pyrenaicum. The yellow turks cap lily from Europe blooms with tenuifolium in early June carrying many small greenish yellow flowers with brown spots. The foliage is graceful. Bulbs are large and should be covered 6 inches50 5.00
Pyrenaicum Rubrum. A red form of the foregoing75, 7.50 per doz.
Regale. Easily the most widely planted and popular lily in America today. Succeeds under widely different conditions and is hardy, vigorous, floriferous, disease proof and absolutely dependable. The fragrant flowers have a delicate pink suffusion with a sulphur throat, externally the colorings show reddish	

	Each	Doz.
brown through the white. We have a big stock of this glorious lily and have this season marked prices down substantially.		
Mammoth bulbs,		
11—12 in. size .75 each, \$7.50 doz.		
Extra big bulbs, 9—11 in. size,		
.50 each, 5.00 doz., 40.00 per 100		
Large flowering bulbs,		
.40 each, 4.00 doz., 30.00 per 100		
Good flowering bulbs,		
.25 each, 2.00 doz., 18.00 per 100		
Roezlii. A moisture loving Lily from California, does very well in New England, stem rather slender, leaves long, slender and crowded, flowers are of a clear reddish orange, recurving and dotted maroon50	5.00
Roezlii, Crimson Form. This is like the type but the flowers are of a deep blood red lightly dotted maroon, long slender foliage50	5.00
Rubescens. This is the Redwood or Chemise Lily. Tall slender stalks and very fragrant tubular flowers, these are white with purple dots when opening changing to deeper purple, and varying shades may be seen on the same plants. Give very good drainage50	5.00
Rubellum. A pretty very early flowering dwarf lily, fine for the rock garden in well drained pockets. The flowers are rather light pink in color and tube shaped, is also fine for pot culture	40 each, 4.00 doz.,	30.00 per 100
Sargentiae. Mrs. Sargent's lily flowers about three weeks later than regale, the large tubular flowers are pure white within, outside they are reddish brown. Plant at least 8 inches deep, be sure soil is well drained and this lily will thrive with you although not to the same degree as regale75	8.00
Shuksan. This is the best of the several hybrids raised by the late Dr. David Griffiths between pardalinum and Humboldti magnificum. Does very well in the east proving superior to the Humboldtis.		
Strong flowering bulbs	1.50	
Shelburne Hybrid. A very fine and vigorous hybrid between Sargentiae and regale raised in Shelburne, Vermont, resembles a much glorified Sargentiae but is a hardier and huskier grower than that variety	1.50	16.50
Speciosum Album. Large reflexing pure white flowers which are in season outdoors from mid-August until October. Also good for pot culture.		
.35-.50 each, 4.00-6.00 doz.		
27.50-45.00 per 100		
Speciosum Album Kraetzeri. A striking pure white form with green bands running down the centre of each petal50	6.00
Speciosum Magnificum. The large recurving flowers are rich carmine		

	Each	Doz.
pink, margined white, a very fine variety	25-.50 each, 3.00-5.00 doz.	20.00-40.00 per 100
Speciosum Melpomene. Dark carmine shaded purple, heavily spotted and margined white, an extra richly colored form.	.40-.50 each, 4.50-6.00 doz., 32.50-40.00 per 100	
Speciosum Punctatum. A rare form with broad leaves like auratum platyphyllum secured in England in 1936. Leaves are carried in two straight rows, entirely distinct from all other forms. The beautiful flowers are white, delicately suffused with pink and dotted rose pink. A very strong grower. Stock limited		1.00 each
Speciosum Rubrum. Carries both green and dark stems with rose colored flowers of varying shades.	.25-.50 each, 2.50-5.00 doz., 20.-40.00 per 100	
Sulphur-Gale. A fine hybrid between sulphureum and regale, very vigorous and hardy, extends the flowering season for regales. The flowers are in form like sulphureum and approximate regale in color50 5.00
Sulphureum. A superb late flowering lily from Upper Burmah which proves perfectly hardy in New England. The immense trumpet shaped flowers are pale yellow within, deepening towards the throat, the outside is tinted brownish red. Is also grand for pot culture. A late blooming variety attaining a height of 5—6 feet.		
Good flowering bulbs	1.00	10.00
Extra large flowering bulbs	1.50	16.50
Sutchuenense. Somewhat similar to Willmottiae but has a much sturdier stem and the flowers are spotless, an exceptionally fine Lily. Stock limited		1.50 15.00
Superbum. A magnificent North American lily, thrives in sunshine or partial shade, especially fine in rhododendron beds where it will attain a height of 10 feet. The bright orange recurving flowers are heavily spotted, likes a moist soil but demands good drainage like all lilies.		
Very large cultivated bulbs,		
Strong flowering bulbs,	.40 each, 4.00 doz., 30.00 per 100	
	.20 each, 2.00 doz., 15.00 per 100	
Tenuifolium. Our earliest flowering lily each year is the Siberian coral lily, in 1936 the first flowers opened on May 27. A gem for the rock garden. Graceful foliage and brilliant recurving red flowers carried 6—20 on a stem. This lily, under good conditions grows 3—5 feet high and we have counted 35 flowers to a stalk. Should be in every collection.		
Extra large bulbs,		
Strong bulbs,	.40 each, 4.00 doz., 30.00 per 100	
Good flowering sized bulbs,	.25 each, 2.50 doz., 15.00 per 100	
	.20 each, 2.00 doz., 12.00 per 100	

	Each	Doz.
Tenuifolium Golden Gleam. Usually classed as a hybrid between <i>tenuifolium</i> and <i>martagon album</i> but is more probably a sport, comes true from seed, carries numerous rich orange yellow flowers		
Extra large bulbs,	.40 each, 4.00 doz., 30.00 per 100	
Fine flowering bulbs,	.25 each, 2.50 doz., 15.00 per 100	
Tenuifolium Red Star. A much glorified <i>tenuifolium</i> , flowers much larger than in the type and less reflexing, color brilliant red	3.00 doz., 20.00 per 100	
Testaceum. The gloriously beautiful Nankeen Lily is the only known natural hybrid lily in existence, a cross between <i>candidum</i> and <i>chalcodonum</i> . It should be planted shallow and prefers a well sweetened soil. Should be planted in fall, 4 inches deep; in spring, only from pots. The exquisite nankeen yellow flowers are carried 6—12 to a stalk and open in late June and early July. There is a demand for this lily far in excess of the supply. We have a large stock of splendid bulbs.		
Strong flowering size	1.50	16.50
Good flowering size	1.00	10.00
Nice blooming bulbs75 each, 8.00 doz.	
Tigrinum. The old Tiger lily often seen growing splendidly about abandoned homes and along roadsides, gives a fine touch of color in mid-August, splendid for naturalizing.	.20 each, 2.00 doz., 12.50 per 100	
Tigrinum Flore-Pleno. A double form which is very pleasing, flowers a little later than the single form, rather less brilliant in color30	3.00
Tigrinum Fortunei Giganteum. Extremely vigorous, growing 6 feet or more in height, sometimes carrying 30—50 flowers per stem, color salmon orange spotted deep purple.	.25 each, 3.00 doz., 20.00 per 100	
Tigrinum Splendens. An especially fine form with rich deep orange flowers, spotted black. By planting in late spring vigorous stalks may be had in flower as late as September 15	25 each, 2.50 doz., 18.00 per 100	
Umbellatum. Early and very free flowering hybrids, coming in many shades of color, in season during June and early July. Fine mixture.	.20 each, 2.00 doz., 12.50 per 100	
Umbellatum Apricot. Of a lovely rich apricot shade, husky grower, carries 8-10 flowers per stalk50	5.00
Umbellatum Darkest of All. Remarkably fine deep red	1.00	10.00
Umbellatum Erectum. Fine form, sturdy habit, rich red flowers freely produced	25 each, 2.50 doz., 18.00 per 100	
Umbellatum Feu Brilliant. Rich orange red, extra large flowers, fine variety	.30	3.00
Umbellatum Golden Fleece. A superb variety, large umbellate heads of		

	Each	Doz.
golden yellow flowers. Vigorous and very effective, a sterling novelty75	8.00
Umbellatum Grandiflorum. Extreme- ly fine orange red form.	.25 each, 2.50 doz., 18.00 per 100	
Umbellatum Incomparabile. Splendid dark red form25 each, 2.50 doz., 18.00 per 100		
Umbellatum Mahony. This beautiful deep crimson variety is admired by all who see it, dwarfer than Darkest of All and flowers later, is sometimes listed as Mahogany in European catalogues. Everyone seeing this lily wants to buy it. We have a grand stock and can offer it at attrac- tive prices30 each, 3.00 doz., 20.00 per 100		
Umbellatum Orange-man. Rich orange and with extra large flowers.	.25 each, 2.50 doz., 18.00 per 100	
Umbellatum Orange King. Large flow- ers of glowing orange with deep red tips75 each, 8.00 doz.		
Umbellatum Prince of Wales. Early splendid yellow variety, extra large flowers1.00 10.00		
Umbellatum Refulgence. Rich golden orange crimson, tall grower, extra fine35 each, 3.50 per doz.		
Umbellatum Sappho. Very good light orange red variety.	.25 each, 2.50 doz., 18.00 per 100	
Umbellatum Splendidum. The finest of all the highly colored varieties, rich vermillion and orange, very strong grower, carries immense heads of bloom30 3.00		
Umbellatum Vermilion Brilliant. Blood red flowers, with crimson shading, lightly spotted black. A grand variety30 3.00		
Our collection of Umbellatums is a very fine one, these lilies are free from the diseases which trouble some varieties. Bloom very freely each year from mid-June until mid-July and give a good increase each year. They come in colors to suit every taste.		
Wallacei. Warm apricot with rose shading, a charming Japanese form of elegans flowering in August30	3.00
Washingtonianum. A beautiful Pacific Coast lily flowering in early June. The fragrant flowers open white, turning purplish pink as they age, 25 or more flowers are carried on good stems. This variety should be given a well sheltered position or winds will spoil the lovely but rather fragile flowers. Our bulbs are cultivated and not to be compared with the badly dried up collected ones usually sold. Extra large bulbs, .75-1.00 each, 8.00-10.00 doz.		
Willmottiae. Miss Willmott's lily is vigorous and hardy, attaining when established a height of 5—6 feet and carrying up to 30 flowers per stem. The recurring flowers are of a vivid reddish orange color and appear about mid-July. The foliage is graceful and the plant of a very re-		

	Each	Doz.
fined appearance.		
Extra large bulbs60	7.00
Strong flowering size50	5.00
Nice flowering bulbs30	3.50

Additional to the foregoing list we have small stocks of a number of other new or scarce varieties, names and prices of which will be gladly forwarded on application.

We cordially invite all interested in these bulbous aristocrats to come and look over our beds the coming season, a few blooms open in late May, during June and July numerous varieties will be found flowering, others extend the season through August and September until late October. We will have a good many varieties in pots blooming ahead of the outside dates.

LILIUM SEEDS

A great majority of Lilies come quite readily from seeds. Some like regale and all its hybrids, Pride of Charlotte, Wilmottiae, Davidi, Formosanum, Henryi, tenuifolium, umbellatum, candidum, Salonica var., amabile, concolor, longiflorum, and elegans will usually germinate within a month. On the other hand auratum, speciosum, martagon, Marhan, the Backhouse hybrids, giganteum Himalaicum, and all North American varieties are very slow some requiring as much as 12 months to germinate, some of these will make a small bulb but no leaves the first season.

Sowing may be done under glass, in the home in winter, or in cold frames, or the open about May 1. Rather late fall before sharp frosts is another good time to sow seeds outdoors or in a frame. Started early, Formosanum will flower the first season, a number of others will bloom the second season.

Seeds may be sown in either shallow drills or broadcasted, cover not over $\frac{1}{4}$ inch. For soil a mixture of garden soil, sand and either leaf mold or peat moss answers very well.

Unless otherwise priced seeds are 25 cents per pkt.; 12 vars., for \$2.00; larger pkts. for 50 cents and \$5.00 per doz. We will be happy to make up collection of easy germinating varieties for those wishful for a start in raising Lilies from seed.

NEW PRACTICAL BOOK ON LILIES

“Lilies and Their Culture in North America”

By William N. Craig

Covers the Culture of Lilies both in the Garden and Greenhouse, treats over 100 varieties. Profusely illustrated with full page plates. Covers such points as Lilies in History, Classification of Lilies, Geographical Distribution, Suitable Soils, Manures and Fertilizers, Lime and its Effects, the Value of Mulches, Depths to Plant Lilies, Preparation of Soils, Lilies for Special Permanent Purposes, Lilies for Cutting, Insect Pests and Diseases, Propagation, Lilies for Pot Culture and Forcing, Notes on Varieties.

This, the first work on Lily culture in America, has been warmly praised by the Horticultural press of both America and Europe. 144 pages.

Price \$3.00 postpaid from the Author in Weymouth, Mass., or The Florists Publishing Co., South Dearborn Street, Chicago, Ill.

The Lily Year Book for 1936

Published by the Royal Horticultural Society in England. Contains splendid articles on Lilliums. Finely illustrated. 145 pages with index. Of great value to everyone growing Lilliums. Have a supply of this splendid Year Book and can mail promptly on receipt of orders. Price \$2.00 per copy.

DUTCH AND OTHER HARDY BULBOUS PLANTS

We carry only the highest grade of bulbs purchasable no matter whether foreign or American grown. In Tulips the highest grade of bulbs obtainable are carried, while in Narcissi we handle only what are known as "double nosed" bulbs. We cordially invite would-be buyers to inspect our stock and note the quality as compared with the inferior grades offered at prices sometimes a little lower but often much higher.

Virtually all Dutch grown bulbs and domestic narcissi are here by September 15, many of them earlier. In the present list a number of obsolete varieties have been dropped and superior kinds take their places, this is especially true in the Darwin and May Flowering sections of Tulips.

Where orders are required by mail, customers should include sufficient in their remittance to cover cost of Parcel Post. Large orders are shipped per express but can be divided into several packages and go per mail when necessary.

DARWIN TULIPS

	Doz.	100
Afterglow. Deep rosy orange, salmon tinted edges, inside deep orange, very fine75	\$5.50
Anton Mauve. Bluish lilac, enormous flower75	6.00
Baronne de la Tonnaye. Rose shaded blush, a beautiful flower, very robust55	4.00

Virgilius. Rich dull blue purple, lighter towards edge80	6.00
Wilberforce. Buff yellow, tinted soft apricot75	6.00
Fine Mixture Breeder Tulips60	4.50

MAY FLOWERING OR COTTAGE TULIPS

The May flowering tulips start to bloom about May 15 and some varieties are in fine condition until early June. Some varieties are quite fragrant, all are graceful in habit usually with longer and more pointed buds than other types. They are excellent in clumps in flower borders, some naturalize finely in grass lands, all are quite persistent. Their popularity steadily increases.

	Doz.	100
Adonis. Reflexed very long petals, vivid carmine red with white base...	\$.75	\$5.50
Albino. Lovely creamy white75	6.00
Amber. Very unique color, terracotta shaded amber, base yellow with some blue70	5.50
Ambrosia. Inside salmon orange, outside shaded lilac rose, tall and extra large, a beautiful variety60	4.50
Artemis. Bright carmine rose, lily flowered type60	4.50
Avis Kennicott. Magnificent large rich yellow75	6.00
Bouton d'Or (Syn. Ida). Pure golden yellow50	4.00
Buff Beauty. Lovely salmon orange, shaded buff75	6.00
Carrara. A magnificent snow white variety. Has charmed everyone who has seen or grown it80	6.00
Dido. Superb variety, inside bright salmon rose, yellow base bordered		

	Doz.	100
green. Outside orange red with carmine shade and orange shaded edges	.60	4.50
Dulcinea. Robust round flower, inside glowing orange, with yellow and greenish base, outside vivid red60	4.50
Elegans. Dark crimson, lily flowered type65	5.00
Elegans Lutea Pallida (Leghorn Bonnet). Lovely soft yellow, long pointed bud75	5.50
Elegans Lutea Maxima (Golden Spire). Deep golden yellow75	6.00
Ellen Willmott. Soft creamy yellow, reflexed petals50	4.00
Fairy Queen. Rosy heliotrope, margined amber yellow50	4.00
Gesneriana lutea pallida (Mrs. Keightley). Pale primrose, fragrant, fine form75	6.00
Gesneriana major (spathulata). Brilliant scarlet with blue black centre, grand late variety50	4.00
Golden Harvest. Very large soft yellow, a glorified Moonlight, grand variety	2.00	15.00
Grenadier. Dazzling rich orange, height 21 inches55	4.00
Hebe (Lily flowered). Beautiful salmon rose70	5.50
Honeymoon. A tall pale yellow similar to Moonlight, 28 inches, a grand acquisition75	6.00
Inglescombe Pink (Salmon Queen). Rosy pink with blue green centre . .	.50	4.00
Inglescombe Yellow. Large glossy yellow flowers, much used as a yellow Darwin. Height 28 inches50	4.00
John Ruskin. Salmon rose edged light yellow, inside rose lilac and margined yellow, justly popular, 20 inches60	4.50
La Merveille. Soft orange apricot tinted rose, large elegant flower50	4.00
Leda. Beautiful glowing salmon pink70	5.50
Lemon Queen (Mothers Day). Light yellow, tall and late75	6.00

Vesta. Tall striking pure white, dark stamens70	5.50
Viridiflora. Green, edged yellow, very interesting	1.00	
Vitellina. Large pale primrose, creamy with age75	6.00
Walter T. Ware. Few yellows equal this variety in rich coloring75	6.00
Fine Mixture Cottage Tulips50	4.00

TRIUMPH TULIPS

A new race of tulips, a cross between the Single Early and Darwin types. They are very useful in border plantings on account of their strong stems and unique colors. In height they are intermediate between the two types as well as in their period of flowering. The following are some of the best varieties.

	Doz.	100
Algiba. Clear heliotrope, very popular	\$.60	\$4.50
Kansas. Grand pure white, yellow stamens80	6.00
Lord Carnarvon. Rose with white edge, very large60	4.50
Nova. Lovely salmon apricot, very distinct80	6.00
Orange Glow. Pure orange, extra fine	.75	6.00
Rose Triumph. A truly lovely combination of pure white and bright pink	.75	6.00
Telescopium. Violet, tinted rosy red, inside wine red; justly popular75	6.00
Ursa Minor. Beautiful rich yellow, outclasses all others of this shade...	.85	6.50
Zimmerman. Vivid rose on cream, edged deeper rose, tall60	4.50
Fine Mixture Triumph Tulips60	4.50

NOTE:—The Triumph Tulips are equally as fine as the Darwins, grow quite tall and are being preferred by some to either Darwins or Breeders.

PARROT TULIPS

With the addition of a number of new and very lovely varieties these fascinating Tulips are becoming much more popular, nearly all of the newer varieties have stiff stems holding the flowers up well.

.20 each, 2.00 doz., 15.00 per 100

Bedding size, fine for outdoor pur-poses 12½ cents each, 1.25 doz., 9.00 per 100

ROMAN HYACINTHS

These popular bulbs are not hardy but are splen-did for indoor culture and flower much earlier than the larger Dutch hyacinths.

Pure White, Pink, Blue 15 each, 1.50 doz.

NARCISSI

There has been a tremendous increase in the interest in Daffodils within the past year and we have included in the present list numerous additions of the less common, new and unusual varieties raised by European hybridists. These hybrids are tremendous advances over the old standard varieties and are the results of years of painstaking work by such noted hybridists as Mrs. Backhouse, Williams, de Graaff, Van Waveren, Barr, Brodie and others.

We would draw attention to the fine selection of varieties we offer for the Rock Garden, a selection of which will give flowers over a quite long season.

We handle only the finest quality of double nosed bulbs and invite an inspection of our stock. Also a visit to our gardens in Daffodil time.

LARGE TRUMPET SECTION

	Doz.	100
Aerolite. A beautiful variety with deep golden trumpet and primrose perianth, an outstanding daffodil..	\$1.50	\$11.00

Campernelle Rugulosus (flore pleno). A fully double form, very pleasing..	.60	4.50
Golden Sceptre. Yellow, very large golden cup, extra fine75	6.00
Orange Queen. Rich deep orange, very distinct, a splendid grower ..	.75	6.00
Canaliculatus. (See Rock Garden daffodils.)		
Juncifolius. (See Rock Garden daffodils.)		

ROCK GARDEN SECTION

Virtually all of these varieties are suitable for the rock garden in addition to the sweet jonquils and some others already listed. Some like Queen of Spain, Salmonetta, William Goldring, W. P. Milner and Thalia are also fine for naturalizing where grass is not too coarse. Cover bulb 6—8 inches deep for best success. Many failures are due to too shallow planting.

	Each	Doz.
Bulbocodium. The Hoop Petticoat of Medusas Trumpet daffodils are very charming in the rock garden. We offer several varieties of this type.		
Bulbocodium Citrinus. Beautiful pale citron flowers 6—8 inches high, likes a damp position and enjoys a soil with peat and leaf mold	\$.15	\$1.50

		Each	Doz.
Bulbocodium Monophyllum.	Little snowy white flowers of great beauty. Give no manure25	2.50
Bulbocodium Conspicuum.	Rich golden yellow of hoop petticoat like form and fine rush like foliage. Likes sandy peat10	1.00
Canaliculatus.	Dainty little gem, give full sunshine. Heads of 3—4 flowers have white perianth and yellow cup, very fragrant15	1.50
Circlet.	Flat creamy white perianth, petals touching and overlapping, fine poeticus like disc covering 1/3 the area of the petals40	4.00
Cyclamineus.	Rich yellow trumpet, perianth reflexed like a cyclamen. Likes a moist location and a sandy peaty soil30	3.00
Cyclamineus February Gold.	A hybrid from cyclamineus, perianth golden yellow, trumpet tinged with orange25	2.50
Glitter.	Perianth and cup deepest golden yellow with glittering red edge. A choice little mite on an 8 inch stem15	1.25
Johnstoni Queen of Spain.	Pure canary yellow, gracefully nodding trumpets of small size on 9 inch stems25	2.50
Juncifolius.	A miniature rush leaved daffodil, 4—5 inches in height, small rich very fragrant yellow flowers..	.25	3.00
Minimus.	Smallest of all trumpet daffodils and the first to flower. We had blooms fully expanded on February 25 outdoors in 1933, only 3 inches in height with pure golden trumpets. Succeeds well in loam30	3.00
Minor.	A very scarce variety, grows 6 inches high, golden yellow perianth gracefully twisted, trumpet golden50	5.00
Moschatus of Haworth.	A charming little daffodil from the Pyrenees, snowy white with a drooping perianth, likes a little shade35	3.50
Nanus.	A miniature golden trumpet daffodil 4—5 inches high, about intermediate between minimus and minor in size, very early30	3.00
Salmonetta.	Very charming dwarf Leedsii, white perianth and salmon tinted cup often carries twin flowers10	1.00
Triandrus Agnes Harvey.	A dainty daffodil of drooping habit, snow white, flowers carried 1—3 per stem, naturalizes finely20	2.00
Triandrus Calathinus.	An exquisite little daffodil, the drooping clusters of new white flowers are carried two and three per stem60	7.00
Triandrus Albus.	The dainty little "Angels Tears" narcissus, pure white flowers. Likes a rather gritty soil10	1.00
Triandrus Thalia.	A hybrid with Triandrus as one of the parents, carries 3—4 flowers per stem which are snowy white in color, sufficiently ro-		

	Each	Doz.
bust to thrive in the average garden border, a truly exquisite variety better known as the "Orchid narcissus"25	2.50
Triandrus Moonshine. An exquisite hybrid, star shaped creamy white flower often 3 to a stem drooping gracefully50	5.00
Triandrus Mrs. Alfred Pearson. White perianth and pale primrose cup, dainty star shaped flowers20	2.00
W. P. Milner. A charming pure white free blooming variety, naturalizes well25	2.50
William Goldring. The "swans neck" daffodil, primrose passing to white and very graceful, quite a robust grower, but its habit makes it fit in well in the rock garden20	2.00

MIXTURES OF NARCISSI FOR NATURALIZING PURPOSES

THE DAFFODIL YEAR BOOK FOR 1936

Published by the Royal Horticultural Society of England. Contains splendid articles on Daffodils by the best experts, beautifully illustrated. Of great value to everyone interested in Daffodils. I have a supply of this fine publication on hand and can mail promptly. \$2.00 per copy post paid.

CROCUS, SPRING FLOWERING SECTION

Except that we offer two sizes of Mammoth Golden Yellow Crocus all others are of the largest sized bulbs procurable, we do not carry the smaller sizes which are offered cheaply by many firms. Bulbs of golden yellow will carry 15-20 flowers per bulb and those of the larger flowered blues, whites and striped 6-12 each. Field mice, moles and grey squirrels annually

destroy great numbers of these bulbs, we will be glad to tell anyone having troubles from these pests how to prevent bulbs from being destroyed.

	Doz.	100

Biflorus Scotch Crocus. Winter variety, striped	\$.60	\$4.50
Pusillus. Lovely pure white form.....	.75	5.00
Imperati. Lilac, outside zoned brown, lovely variety80	46.00
Korolkowi. The earliest yellow, from Turkestan, very lovely	1.00	7.50
Sieberi. Pale lilac with orange centre, from Greece50	4.00
Susianus (Cloth of Gold) from the Crimea. Early yellow40	3.00
Versicolor. White, pencilled purple, from France40	3.00
Collection Species Crocus, 10 varieties, 10 of each for \$4.00.		
Fine Mixture Species Crocus, \$3.00 per 100.		

GALANTHUS (SNOWDROP)

	Doz.	100
Byzantinus. Very early, large snowy white feathers	\$.50	\$4.00
Elwesii. The largest and finest variety, extra robust50	4.00
Fine second sized bulbs40	3.00
Nivalis Flore-Pleno. Double snowdrops, excellent in grass50	4.00
Nivalis Simplex. The old original single snowdrop50	4.00

CHIONODOXA (GLORY OF THE SNOW)

	Doz.	100
Gigantea (Alleni). Soft lavender, large flowers	\$.40	\$3.00
Luciliae. Lovely rich blue with pure white centre40	3.00
Luciliae Alba. Very pretty pure white form	1.00	7.50
Tmolusi. Lovely bright blue and white variety40	3.00
Sardensis. Interior bright blue, very lovely40	3.00

ERANTHIS (WINTER ACONITE)

	Doz.	100
Cilicica. Very distinct, finely divided leaves and large flowers	\$.50	\$3.50
Hyemalis. Golden yellow, one of our very earliest flowers50	3.50

FRITILLARIA

Fritillaria Imperialis is tall and stately growing, a yard in height and flowering in late April in New England, their large lily like flowers are very handsome. The varieties of meleagris which bloom in May are fine in the border, rock garden or for naturalizing, all stand considerable shade.

	Each	Doz.
Imperialis Maxima Lutea. Yellow Crown Imperial, very robust striking plants, flowering in late April..	\$.50	\$5.00
Imperialis Maxima Rubra. Red colored variety, grows 2—3 feet high..	.50	5.00
Imperialis Orange Brilliant. Rich orange color40	4.00
	Doz.	100
Meleagris. The Guinea Hen Flower is well suited for naturalizing50	4.00
Meleagris Alba. Charming pure white form for the rock garden50	4.00
Meleagris Aphrodite. A lovely white variety, growing taller than the type	1.00	7.50

IRIS, DUTCH VARIETIES

These bulbous iris are the results of crossing Hispanica on such varieties as filifolia, tingitana, lusitanica and others. They have more robust stems than the Spanish iris, also blooming in advance of them. All of these Iris are fine in the garden being perfectly hardy if planted in well drained ground an average of 4 inches deep. They flower just as the bearded (German) iris are passing. Prices are now within the reach of all.

	Doz.	100
Blue Horizon. Delightful shade of blue	\$.50	\$4.00
D. Haring. Creamy white falls, standards silvery lavender50	4.00
Golden Bronze. A lovely bronze60	4.50
Golden Glory. Standards golden yellow, falls darker55	4.00
Jacob de Wit. Standards and falls both dark blue60	4.50
Imperator. Large free flowering dark blue, later than the regular Dutch varieties60	4.50
Poggenbeeck. Dark blue, an especially rich color60	4.50
Van Ravenstein. Pure pearly blue, color of Scabiosa caucasica50	4.00
Wedgewood. Beautiful Wedgewood blue, very early75	6.00
White Excelsior. Extra large snowy white variety55	4.50
Yellow Queen. Golden Yellow60	4.50

SPANISH IRIS (IRIS HISPANICA)

These bulbous Iris are splendid for culture in the garden flowering immediately after the Dutch varieties. Plant late in the fall covering 4 inches. They are perfectly hardy in New England. For forcing they are unexcelled.

Cajanus. Canary yellow, orange blotches on falls	\$.50	\$4.00
King of the Blues (Count of Nassau). Fine rich purplish blue50	4.00
King of Whites. Rare white50	4.00
King of Yellows. Golden yellow50	4.00

ENGLISH IRIS (IRIS ANGLICA)

We are glad to be able to offer a fine selection of these beautiful Iris in separate colors. They flower after the Spanish and Dutch varieties have finished and considerably extend the season. The stems are sturdier and the flowers larger than the other bulbous types while the colors are especially rich. Given good drainage and planted 6 inches deep these have proved perfectly hardy with us.

Emperor. Deep blue, flamed deeper ...	\$1.00	\$7.50
Ideal. Pale mauve heliotrope	1.00	7.50
King of the Blues. Dark blue	1.00	7.50
Montblanc. Snow white, very lovely..	1.00	7.50
Prince Albert. Delicate silvery blue ..	1.00	7.50
Princess Irene. Tall snow white	1.00	7.50
Queen of the Blues. Deep sky blue....	1.00	7.50
The Giant. Immense deep blue, flamed bluish black	1.00	7.50
Fine Mixture Iris Anglica60	4.50

MISCELLANEOUS IRIS

Iris Reticulata. A perfect gem for culture in the rock garden, a very early bloomer	\$1.50	\$10.00
--	--------	---------

CAMASSIAS

Camassias are interesting and very attractive hardy bulbous plants from the Western Northern American states. They are best planted in the fall 6 inches deep in any good soil, but avoid fresh manures. They enjoy plenty of moisture during the growing season, in fact in their native habitats they are often standing in water when in flower, through the summer they succeed best if allowed to dry out very thoroughly. They add great interest to the spring bulbous garden.

Leichtlini. Robust variety, much the best of the family, often 3 feet high, flower scapes are usually clear blue but occasionally white	\$1.50	\$12.00
Leichtlini Alba. White and cream col- ored flowers	1.50	12.00

SCILLA (SQUILL)

	Doz.	100
Campanulata Alba. Pure white flow- ers in late May	\$.40	\$3.00
Campanulata Caerulea. Rich blue, spikes like miniature hyacinths....	.40	3.00

	Doz.	100
Campanulata Peach Blossom. Soft rose, extra large and fine50	4.00
Campanulata Rosea. Popular lavender pink shade40	3.00
Campanulata Sky Blue. Very rich blue40	3.00
Nutans Alba. Pure white40	3.00
Nutans Caerulea. The popular English bluebell40	3.00
Nutans Rosea. Of a pleasing pink color40	3.00
Scilloides. (Better known as Puschkinia libanotica)60	4.50
Sibirica (Amaena). Delft blue, extremely popular50	4.00
Sibirica Alba. Pure white50	4.00
Sibirica Spring Beauty. Glorious variety, rich delft blue, four times the size of Sibirica. Supply still rather limited	1.00	7.50

MUSCARI (GRAPE HYACINTH)

	Doz.	100
Armeniacum. Deep cobalt blue, larger than "Heavenly Blue"	\$.60	\$4.50
Azureus. Flowers are of a Cambridge blue shade and very lovely40	3.00
Botryoides Alba. Pure white, a lovely form60	4.50
Botryoides Caerulea35	2.50
Heavenly Blue. Light blue, large trusses, immensely popular50	4.00
Plumosus (Feathered hyacinth). Rich purple spikes. Blooms in June50	4.00
Racemosus. Deep blue, very fine50	4.00

COLCHICUM

These fall flowering meadow saffrons are often called "fall crocus" but they differ materially from the latter making quite large bulbs which carry a number of flowers each, they also grow taller than the true crocus and produce their large leaves the following spring, the regular flowering time is late September and October.

	Each	Doz.
Autumnale (Commonly called "Autumn Crocus"). Very free blooming of easy culture	\$.25	\$2.50
Autumnale Alba. Pure white, increasing fast30	3.00
Autumnale Major. Extra large rosy purple flowers30	3.50
Autumnale roseaplena. Double rosy pink30	3.00
Bornmuelleri. Long tubed rosy lilac flowers, very fine35	4.00
Gigantheum. Immense lilac, late bloomer40	4.50
Premier. Dark lilac40	4.50
Speciosum. Pleasing rose color30	3.00
The Giant. Very large. Deep lilac mauve, white in centre75	7.50

AMARYLLIS

	Doz.	100
Halli (<i>Lycoris squamigera</i>). The hardy amaryllis carrying lovely lavender pink spikes of flower in August, plant 8 inches deep. Bulbs are scarce	\$1.00	\$10.00
Large flowered hybrids for indoor culture, mammoth bulbs50	5.00

ORNITHOGALUM (STAR OF BETHLEHEM)

Interesting and easily grown spring flowering bulbs, *umbellatum* is very hardy and increases rapidly.

	Doz.	100
Arabicum (Arabian Star of Bethlehem). Large umbels of pure white flowers, outdoors afford good drainage and winter covering	\$.80	\$6.50
Umbellatum . Heads of small white flowers, extremely hardy, found in many old gardens, naturalises well..	.50	4.00

IXIOLIRION

Few hardy bulbous plants are as lovely as the Ixiolirions. Everyone is attracted by them. They come in season after the last of the late tulips have passed. They enjoy a light porous soil, attain a height of 18 inches and their flower heads are well branched. The rather open but tubular shaped flowers are of a lovely blue color, flowers averaging 2 inches in diameter. They have proved hardy for years in northern New England. Everyone growing them will be thrilled with their beauty.

	Doz.	100
Ledebouri . Lovely blue tubular shaped flowers, blooms just ahead of <i>I. Pallasi</i> and is slightly paler in color	\$.25	\$10.00
Pallasi . The umbels of heavily branched rich blue flowers are very lovely	\$.25	\$10.00

STERNBERGIA

The Sternbergias carry large upright crocus like flowers in fall and have been given a variety of common names like "Lily of the Fields," "Autumn Daffodil" and others. They like a warm, well drained soil such as a rockery affords and should be planted 8 inches deep.

Lutea. Large clear yellow crocus like blooms in October

\$2.00 \$15.00

FREESIAS

	Doz.	100
Golden Daffodil. Very large yellow, extra sized bulbs	\$.50	\$4.00
Elders Giant White. Much the largest and finest white60	4.50
Purity. Still the leading variety for pot culture and cutting40	3.00
Note. Bulbs of Freesias are ready in late July, they can be planted in pots as late as December. Excellent for house culture.		

ANEMONE

	Doz.	100
St. Brigid Champions. The largest and finest strain of these popular Anemones ever offered in this country, in a wide range of colors, 90 per cent will come double	\$.60	\$4.50
Appenina. A charming blue form of this lovely anemone75	6.00

LEUCOJUM

	Doz.	100
The summer snowflake carries several of the large snowdrop like white bells to a stalk, in foliage and bulbs suggestive of narcissus. Enjoys rather moist ground but thrives in an ordinary perennial border.		
Aestivum. Grows 18 inches in height producing its pendulous flowers on sturdy stems in May	\$.75	\$6.00
Vernum (Spring Snowflake). An early bloomer only 6—8 inches high carrying pretty nodding green and white flowers. The Leucojums are better left undisturbed from year to year ..	.85	6.50

PUSCHKINIA

	Doz.	100
Libanotica (Scilloides). Also known as Scilla scilloides, a charming bulbous plant, the spikes of blue flowers with white midribs average 8 inches in height and are very pretty	\$.60	\$4.50

EREMURUS (FOXTAIL LILY)

These strikingly beautiful hardy desert plants come to us from the mountains of Western and Central Asia. My first planting of them in Massachusetts was as long ago as 1900. Their large octopus-like roots should be planted in the fall preferably in well drained soil which should contain plenty of either peat moss or leaf mold with a good addition of sharp sand. Cover the roots about 5 inches and the central

crown rather less. Growth starts very early in the spring and to prevent injury to the shoots draw earth about them and tuck some sort of evergreen branches around them to protect them. Spikes will rise to a height of 10 feet or more on well established plants and their sturdy stalks from which pushes 2—3 feet of flowers in late May are thrilling to all flower lovers. Lay a piece of tar paper over crowns in winter to shed water although they usually do not require this care. Protect with salt hay or leaves over winter. We only offer strong flowering sized roots.

Bungei. Golden yellow, a dwarfer grower than others \$1.50, \$2.00 each

Elwesianus. Very robust, flowers are soft pink. 3.00 each

Elwesianus Albus. A lovely pure white form, very good grower 3.00 each

Himalaicus. An extra vigorous grower, color pure white 2.00 each

Him-Rob. A charming hybrid intermediate between Himalaicus and robustus, has great vigor 3.00 each

Robustus. Extremely husky grower, color rich rosy pink 2.00 each

Shelford var. Isobel. Pink with orange shading. 2.50 each

Shelford var. Rosalind. Lovely bright pink. 3.00 each

Shelford White Beauty. Splendid new white. 3.00 each

Sir Michael. Another of the more recent hybrids, lively golden yellow 3.00 each

Tubergeni. One of Van Tubergen's fine hybrids, rich yellow, late bloomer 3.00 each

CONVALLARIA (LILY OF THE VALLEY)

Fortin's Giant. Far the best variety for outdoor plantings, spikes and bells much larger than the varieties used for forcing.

Strong pips,

\$1.00 doz., \$7.50 per 100, \$70.00 per 1,000

Polygonatum (Solomon's Seal). Splendid for shady locations, strong field grown \$2.00 \$15.00

NATIVE BULB AND PLANT MATERIAL

The great bulk of our lovely and interesting Native Plants, including all bulbous material are much better planted in fall than spring. Subjoined is some of the more desirable material which can be successfully planted from September 10 until freezing up weather. We made a large planting in mid-December last year which did splendidly.

Aquilegia Canadense. Fine for naturalising \$.25 \$2.00

Asarum Canadense. Canada Wild Ginger15 1.50

Caltha Palustris. Marsh Marigold15 1.50

Cimicifuga Racemosa. Cohosh Bugbane, extra strong25 2.50

Cypripedium acaule. An excellent variety will thrive well under pine trees. Upper sepals and petals brownish, labellum pinkish purple with dark veinings.

Cypripedium arietinum (Ramshead lady-slipper). Choice and very rare. 75 cents each.

Cypripedium parviflorum. Bright yellow variety with small flowers.

Cypripedium pubescens. A beautiful and persistent yellow variety.

Cypripedium spectabile (Reginae). A truly noble variety, sepals white and roundish, labellum white or pale pink.

Prices of *Cypripediums* except *arietinum*. 20 cents each, \$2.00 per doz. Extra strong clumps 50 cents to \$2.00 each, according to number of pips.

Cornus Canadensis. Bunchberry.			
Strong clumps	\$.25	\$2.00	
Dodecatheon Meadia. Shootingstar ..	.20	2:00	
Epigaea Repens, Mayflower. Fine es- tablished clumps50	each	
Erythronium albidum (White trout- lily)		1.00	
Erythronium Americanum (Common trout-lily)		1.00	
Goodyera Pubescens. Downy Rattle- snake Plantain15	1.50	
Hepatica Acutifolia. Sharplobe He- patica. Cultivated plants20	2.00	
Hepatica Triloba. Roundlobe Hepat- ica. Cultivated plants20	2.00	
Mertensia Virginica. Virginia Blue- bells. Extra strong30	3.00	
Virginica Virginica. Good flowering roots20	2.00	
Mitchella Repens. Partridgeberry. Fine clumps20	2.00	
Potentilla Tridentata. Wineleaf Cinque- foil. Cultivated cuts25	2.50	
Sanguinaria Canadensis (Bloodroot). Strong flowering roots15	1.50	
Trillium erectum. Purple Trillium.			
Trillium grandiflorum. Great snowy Trillium, the finest variety.			
Trillium nivale. Nodding white Trillium.			
Trillium recurvatum. Prairie Trillium, dark pur- ple, rare.			
Trillium stylosum. Rose Trillium, rosy pink flowers.			
Trillium undulatum. Painted Trillium, early bloomer, flowers have scarlet markings.			
Prices of <i>Trilliums</i> . 10 cents each, \$1.00 doz., \$7.50 per 100.			
Viola Pedata bicolor. Strong cultivated plants of this lovely <i>Viola</i>25	2.50	

HARDY FERNS

Of these we carry a good selection in stock. Well established plants. List on application, \$.20 each, \$2.00 doz.

CHRISTMAS ROSES

	Each	Doz.
Helleborus Niger praecox. Dwarf form of Christmas Rose	\$1.00	\$10.00
Helleborus Niger altifolius. Taller and better form than praecox	1.00	10.00
Helleborus Orientalis (Lenten Rose). Later bloomer than niger, colored flowers	1.00	10.00
Helleborus Orientale Hybrids. These include some splendid colors	1.50-2.00	each
Helleborus Viridus. Green flowers, wide well branched heads of flower	1.00	10.00

Note. All of the Helleborus like a soil containing plenty of humus including old well rotted manure and some sharp sand. They should have partial shade and a summer mulching of peat moss. Water in very dry weather only. September and October are excellent months for planting these interesting and charming winter and early spring bloomers.

HARDY HERBACEOUS PERENNIALS

Our exhibits of Herbaceous Perennials in Boston have been awarded a number of gold medals. We have in stock extra fine selections of Peonies, Iris, Delphiniums, Phloxes, Pentstemons, Scabiosas, Sidalceas, Asters, Aconitums, Aquilegias, Hemerocallis, Geums, Doronicums, Gypsophilas and other varieties, all of which will do very much better if planted in fall rather than spring.

We have 20 of the most outstanding of the new hybrid Hemerocallis, strong plants \$1.00 each, \$10.00 doz. Hyperion \$2.50 each, Mikado and Vesta \$2.00 each.

HARDY ROSES

We carry a selection of over 150 varieties of Hardy Roses including all of the best Hybrid Teas, Hybrid Perpetuals, Climbers, Polyanthas, Rugosas, and Species. Late October and November are splendid planting periods. We have many of the leading novelties. Special list on request.

ROCK GARDEN PLANTS

We have in stock a very fine assortment of plants for Rock Gardens including Saxifragas, Drabas, Arenarias, Androsaces, Sempervivums, Sedums, Aubretias, Helianthemums, dwarf Iris, Erinus, Veronicas, Primulas, and other varieties, also hardy Ericas, Pachistimas, Cotoneasters, small leaved Euonymus and other plants.

HORTICULTURAL SPECIALIST

We always have in stock a good selection of choice Flowering Shrubs, Fruit Trees, Coniferous and broad leaved Evergreens, and hardy Climbers.

A few specialties always to be found here are:—

150 Lbs. Ton

Quality Brand Sheep Manure	\$2.50	\$45.00
Pure Ground Bone	2.50	45.00
Canadian Hardwood Ashes	2.50	45.00

Vigoro

5 lbs., .50; 25 lbs., 1.75; 50 lbs., 2.75; 100 lbs., 5.00

Ideal Holland Peat Moss. The finest

brand imported, indispensable for
many garden purposes.

Bag, \$1.00; bale, \$3.50; 10 bales, \$32.50

Screened Oak Leaf Mold . . \$1.00, bushel; \$2.50 sack

In buying bulbs it is well to remember that there are several grades. In the case of Dutch bulbs of all kinds, and the Narcissi and Iris, now mainly grown on the Pacific Coast, the larger sized bulbs are always the best. We buy only the finest grades to be had. Cheaper offerings made are invariably of small, inferior sizes. That it pays to buy the best there can be no question. In the case of Liliums in which we specialize there are great variations in sizes. For instance, last year we had bulbs of regale over 20 inches in circumference which gave 30-40 flowers per bulb, but we offer small bulbs only 3-4 inches in circumference for those desiring to grow them. Prices are regulated by the sizes in the case of all Liliums. We urge more amateurs to grow lilies from seed.

We sell bulbs of all kinds in 6s at dozen rate and in 25s and 50s at 100 rate.

Free advice on all horticultural matters is always gladly given. Simply write or call up Weymouth 1110.

Rose, Rock, Perennial and Other Types of Gardens Planned and Planted

Expert Advice Furnished on All Horticultural Matters

Lectures Given on Horticultural Subjects, Illustrated if desired
